

Write a Python program to mine/analyze tweets(from twitter) and send it at [sai.pokala@plabro.com](mailto:sai.pokala@plabro.com) & [kanishka.sharma@plabro.com](mailto:kanishka.sharma@plabro.com) in next 2 days.

- a) latest trending topic for India. (#tag and no of tweets for the particular #tag)
- b) Extract first 100 tweets for #JoeBiden
- c) Sentiment Analysis for #JoeBiden (Is it positive/negative, what is the perception)

Deliverable

- 1. Python Code (for “a” and “b”)
- 2. Python code for “c”; [If you are not able to do, send logic for doing “c”]
- 3. Output of code for “a”, “b” and “c” (problem-statement) in txt file.

(Spend around max 2 hours on the assignment; and send whatever is doable)
